Major Exam

Time: 03 Hours 26-11-2024 Max.Marks: 50

Note: Attempt all the questions. Each question carries 7 marks while Q.7 carries 8 marks.
Q No 1-3 is related to case study only.

Case study

Soft core consultancy services are in the information technology sector. Is it currently facing a shortage of skilled manpower and is fuelling a hike in employee salaries, which have been posting a 10-40 percent growth during the last couple of years. While there is an abundance of trainable human resources, a dearth in skilled manpower is being felt across the industry and this has resulted in a hike in salaries. Typically, salary jumps happen not only in the conventional manner of being promoted but also because of professionals changing jobs more frequently. The increase in salaries varies from job to job and ranks highest in the IT sector where employees get a hike of over 40 percent when they join a new establishment. There is no dearth in entry-level human resources as there is a large supply, but a severe shortage is felt in the middle-level positions. According to Mr. Raj, CEO of soft core, many new captives and third-party offshore facilities being set up in the country have led to a competition for skilled human resources that are already scarce. This is also leading to an ever-widening demand-supply gap and raise in the average salary level for all positions, apart from pushing up attrition in existing facilities, he said. There is new trend of employees moving to multinational companies abroad for higher salaries and global experience. The salary package and working environment is far better than India in countries like USA. Then returning to India with global experience makes for a higher pay and position. This is also one reason for the shortage of skilled manpower and hike in employee salaries in the IT sector.

Question: 1. What problems soft core is facing? Suggest some remedies for its problems.

2. Do you support globalization? Why or why not?

3. Do SWOT analysis of the case.

4. What are the components of the environment that impact businesses?

5. What is the role of monetary and fiscal in balance of payments adjustment? Explain.

6. How do we ensure that CSR is not just a side project, but an integral part of our business culture?

7. How important is each technology to the firm? Give an example of firm you are familiar with.

Minor Exam

Time: 02 Hours 26-09-2025 Max.Marks: 20

Note: Attempt all the questions. Each question carries 5 marks. Calculator is allowed.

1. Distinguish between internal and external environments with examples.
2. What is meant by economic liberalization?
3. A manufacturing firm wants to adopt automation but fears job losses. How should it balance efficiency and social responsibility?
4. Partners P, Q, R form Eco Build LLP. Capitals: P = ₹9,00,000; Q = ₹6,00,000; R = ₹5,00,000. Profit-sharing per deed = 2:1:1. Eco Build signs a supply contract for ₹40,00,000 (30% advance). The firm delivers late, and a contract penalty of 6% of the contract value applies. Annual net profit before CSR & penalties = ₹15,04,000. LLP voluntarily spends 2% of its profit on CSR. It then reinvests 25% of the remaining (after CSR & penalties) into a green project. Partnership deed: any partner who withdraws capital without consent forfeits 4% of their annual profit share; Q withdrew ₹1,00,000 without consent this year. LLP tax = 30% on profit after CSR, reinvestment, and penalties.

Calculate:

- (i) penalty amount,
- (ii) CSR,
- (iii) reinvestment,
- (iv) tax,
- (v) distributable pool, (Profit)
