

Question Paper (Business Statistic)

Marks: Forty (40)

Attempt any **five questions**. All questions carry equal marks.

- (1) What are the types of estimates available in inferential statistics? Establish a logical difference between types of estimates.
- ✓ (2) What are the steps in conducting Hypothesis testing?
- ✓ (3) Establish a difference between One-Tailed and Two-Tailed test of hypothesis. *Diag.*
- ✓ (4) What is F-test? In what circumstance, F-Test is used for hypothesis testing for two populations? *an.*
- ✓ (5) What is Two—Way ANOVA?
- ✓ (6) What is chi-square goodness-of-fit test? Explain chi-square test of independence: two-way contingency analysis.
- (7) What is coefficient of determination? What is standard error of the estimate in simple linear regression?

Question Paper (Business Statistics)

Marks: Thirty (30)

Attempt any five **questions**. All questions carry equal marks.

- 1✓ What is the road map for studying Business Statistics? Write your answer in terms of justifying chapter sequences of any book of business statistics.
2. Establish a difference between descriptive statistics and inferential statistics.
- 3✓ What are the tools of measuring dispersion of the data?
- 4✓ What is the role of probability in dealing with inferential statistics?
- 5✓ What is the difference between discrete probability distribution and continuous probability distribution?
- 6✓ What is binomial distribution?
7. What is the role of normal distribution in inferential statistics?

Question Paper (Business Statistics)

Marks: Thirty (30)

Attempt any five **questions**. All questions carry equal marks.

1. What is the road map for studying Business Statistics?
2. What is Histogram? How histogram is used as a key indicator in inferential statistics?
3. Write a detailed note on measures of central tendency and measures of dispersion. How standard deviation is established as a sound tool to catch scatter of the data?
4. How probability acts as a base of inferential statistics?
5. Establish a difference between discrete probability distribution and continuous probability distribution?
6. What is binomial distribution?
7. How normal distribution can be used to make inference from the data? Support your answer with a suitable example?

Question Paper (Business Statistic)

Marks: Forty (40)

Attempt any **five questions**. All questions carry equal marks.

- (1) What are the types of estimates available in inferential statistics? Establish a logical difference between types of estimates.
- (2) What are the steps in conducting Hypothesis testing?
- (3) Establish a difference between One-Tailed and Two-Tailed test of hypothesis.
- (4) What is F- test? In what circumstance, F-Test is used for hypothesis testing for two populations?
- (5) What is Two—Way ANOVA?
- (6) What is chi-square goodness-of-fit test? Explain chi-square test of independence: two-way contingency analysis.
- (7) What is coefficient of determination? What is standard error of the estimate in simple linear regression?

SAFER C.A.E

End Term Exam

Question Paper (Business Statistics)

Marks: Forty (40)

Attempt any five questions. All questions carry equal marks.

- ✓ 1. Establish differences between probability and non-probability sampling techniques.
- ✓ 2. What is Central Limit Theorem and how this is helpful in inferential statistics?
- ✓ 3. What is the difference between point estimation and interval estimation? Is interval estimation better than the point estimation?
4. Is there any mathematical formula for determining sample size? If yes, is this formula useful for the researchers to conduct any research?
- ✓ 5. What are the steps in hypothesis testing?
6. What statistic is used for hypothesis testing for the difference in two population proportions?
- ✓ 7. Establish a difference between One-Way ANOVA and Two-Way ANOVA?

Question Paper (Business Statistics)

Marks: Thirty (30)

Attempt any five **questions**. All questions carry equal marks.

- ① What is the road map for studying Business Statistics?
- 2. What is Histogram? How histogram is used as a key indicator in inferential statistics?
- 3. Write a detailed note on measures of central tendency and measures of dispersion. How standard deviation is established as a sound tool to catch scatter of the data?
- 4. How probability acts as a base of inferential statistics?
- 5. Establish a difference between discrete probability distribution and continuous probability distribution?
- 6. What is binomial distribution?
- 7. How normal distribution can be used to make inference from the data? Support your answer with a suitable example?
